SUMMARY

Growth leader with a decade owning the entire DTC funnel — acquisition, conversion, and retention — as both a founder and a consultant to 7-figure brands. I have personally run Meta media buying, built the funnels and offers, written the direct-response copy, engineered the lifecycle flows (retention +25%, LTV +20%+), and measured all of it on CAC / LTV. I build systems and the people-light automation behind them, ship with an AI-native workflow, and make decisions like an operator because I have carried the P&L.
