SUMMARY

Lifecycle and retention marketer with a decade in DTC e-commerce, specializing in email and SMS programs that compound LTV. I build the segments, write the flows, and read the cohort data as an operator who has run the P&L. On past lifecycle programs I lifted retention roughly 25% and LTV 20%+ (Klaviyo, ActiveCampaign). I do not hand off copy to one team and strategy to another — I own the welcome, replenishment, win-back, and post-purchase journeys end to end, and I write them in the customer's own language.
